Dr. Bruce Kessler
Department of Mathematics
Associate Dean, Ogden College

- My research areas are wavelet theory, signal processing, and mathematical modeling.

- I also have a joint venture to produce software with the WKU Research Foundation and HitCents, Inc., called *Peaklet Analysis* (www.peakletanalysis.com). The commercialization effort is grant-supported, and a U.S. patent is pending on the algorithm behind the software.

Peaklet Analysis
Wavelet-Based Analysis Software for Spectrum Data
Fast, Accurate, Automated
