Matt Bogard Department of Economics (Adjunct)
Clinical Guidance Metrician, Humana Inc.

Matt is an adjunct instructor for the department of economics and primarily teaches business statistics and financial data modeling. Previously Matt worked in the Office of Institutional Research and has done some limited contract consulting in areas related to social network analysis and viral marketing. Matt has done mostly applied work in data mining, predictive modeling, and causal inference and has been programming in SAS and R for almost 7 years. Currently Matt works for Humana doing predictive modeling and program evaluation in the area of Health and Wellness.
