

20-Page AI-Generated Children's Christmas Book

1st Draft (50pts) due November 27th & Final Copy (50pts) due December 4th on Blackboard

Purpose:

The purpose of this assignment is to harness AI tools to develop a captivating 20-page Christmas-themed children's book, integrating both text and images. This project aims to cultivate creativity, proficiency in utilizing AI technologies for storytelling, and the ability to design engaging content for young readers.

Skills Developed:

AI Integration: Leveraging AI for content creation and image generation.

Creative Writing: Crafting a compelling storyline with engaging characters and a cohesive plot.

Illustration and Design: Creating visually appealing images and layouts suitable for children.

Storytelling for Children: Tailoring content to resonate with and engage a young audience.

Project Management: Organizing and structuring a 20-page book effectively.

Task:

Develop a 20-page children's Christmas book using AI-generated content for both text and images. Ensure a coherent storyline, engaging characters, vibrant visuals, and a clear connection to the Christmas theme.

Criteria for Success:

Content Quality (30 points):

- Originality and creativity of the storyline (10 points)
- Engaging characters and dialogue (10 points)
- Relevance and incorporation of the Christmas theme (10 points)

AI Integration (20 points):

- Effective utilization of AI-generated text and images (10 points)
- Seamlessly integrated AI-generated elements into the story (10 points)

Illustrations and Layout (20 points):

- Visual appeal and creativity of illustrations (10 points)
- Consistent layout and design across the book (10 points)

Writing Mechanics (15 points):

- Grammar, spelling, and punctuation accuracy (5 points)
- Clarity and coherence of writing (5 points)
- Age-appropriate language and tone for children (5 points)

Project Organization (10 points):

- Clear structure and organization of the book (5 points)

- Meeting the 20-page requirement without exceeding it (5 points)

Rubric:

Criteria	Needs				
	Excellent (5)	Good (4)	Fair (3)	Improvement (2)	Inadequate (1)
Content Quality	25-30	20-24	15-19	10-14	0-9
AI Integration	18-20	15-17	10-14	5-9	0-4
Illustrations and Layout	18-20	15-17	10-14	5-9	0-4
Writing Mechanics	13-15	11-12	8-10	5-7	0-4
Project Organization	8-10	7	5-6	3-4	0-2

Total Points: 100

Note: The grading rubric is intended to guide assessment based on the quality of work in various aspects of the assignment. Grading within each criterion will consider the level of accomplishment, creativity, technical proficiency, and adherence to the requirements.
