

Name: _____

Bubble Observation Questions

1. Describe what you see on the surface of the bubble. What colors do you see? What patterns do you see? How do the patterns change?

2. What changes did you notice in the way the surface of the bubble looked right before it popped? Did this happen consistently?

3. Have one student gently blow on the surface of the bubble. What do you observe? What do you think is happening?

4. Why do you see so many different colors on the surface of the bubble?
