Rationale for revision of course: Two changes are proposed. First, the current name "Systematics and Evolution" is redundant. Systematics is a subfield of Evolution. Biological Systematics accurately reflects the content covered in this course. Second, this course has been offered as a combination of three hours of lecture with a two hour laboratory. Implementation and integration of a wet laboratory is no longer needed to maintain it as a challenging graduate-level course. The change from a four-credit course to a three-credit course also aligns with the other Biology Department graduate-level courses. Nearly every Biology graduate-level course offered on a regular basis is a three-credit class. 4. Term of implementation: Fall 2017 5. Dates of committee approvals:		Date: 30 August 2016
