- Printed Materials
- Tape/glue
- Scissors

Instructions:

- Cover the board with background paper
- Print sustainability information
- Cut out board title letters
- Create information flip cards.
- Paste information to board in an engaging way

**By reducing your shower time by 2 minutes you can save 10 gallons of water. Thats 200 gallons of water after 20 showers!**

Carpooling is a  
great way to  
reduce carbon  
emissions and  
catch up with  
friends.

By simply reducing  
the temperature to  
be more close to  
the temp outside  
we can save  
money, energy and  
reduce CO2  
emissions.

Environmentally  
friendly changes  
often result in  
saving money.  
Go green to save  
green!

Make sure you  
turn the lights  
off when leaving  
a room and  
utilize natural  
light whenever  
possible!

Buy second  
hand to reduce  
the waste  
generated by  
clothing  
production.

Carry a reusable cup to  
lessen paper and  
plastic waste (plus  
some locations offer a  
discount!). Buy a  
reusable to-go  
container at Fresh  
Food Company and  
Garret Food Court to  
make an even bigger  
impact!

How do you conserve energy?
