

University Senate Resolution on University Title IX Policies and Procedures

The recent episode described in the April 24, 2018 edition of *The College Heights Herald* highlights structural problems with the implementation of the University's Title IX policies and procedures.

Resolved: In the strongest terms possible, the University Senate expresses deep concern with the current process and requests that the administration respond to complaints appropriately and take reasonably calculated action to protect and end harassment against those who file Title IX complaints.

Furthermore, while we support President Caboni's creation of a University Review Committee, we request that the administration respond to the University Senate on this resolution and report back on the results of the review.
